

Sinclair – genealogical haplotree

SNPs and dating of SNP formation

Each box indicates the SNP or SNPs (in bold) carried by the lines of descent enclosed. The brackets indicate the range of dates within which the SNP was formed. Note that SNPs continue unchanged beyond their formation date.

Conclusions are currently provisional and may be refined through testing of more documented male line descendants.

Tentative conclusions are as follows:

FGC15254 indicates a likely descent from William Sinclair of Roslin, d ca 1300.

FGC35613 indicates a likely descent from Henry Sinclair of Roslin, d bet 1330-1336.

The dotted lines around the box for SNP FGC35613 indicate the uncertainty around which of the Sinclair lines the SNP occurred in.
