

## Sutherland – genealogical haplotree

### SNPs and dating of SNP formation

Each box indicates the SNP or SNPs (in bold) carried by the lines of descent enclosed. The brackets indicate the range of dates within which the SNP was formed. Note that SNPs continue unchanged beyond their formation date.

**Conclusions are currently provisional and may be refined through testing of more documented male line descendants.**

**Tentative conclusions are as follows:**

**BY48361** almost certainly indicates a descent from Kenneth, Earl of Sutherland, d 1333.

**BY130907** indicates a likely descent from William, Earl of Sutherland, d 1370.

**BY67446** It is highly likely that this indicates a descent from Kenneth Sutherland, 1<sup>st</sup> of Forse, b 1352.

The dotted line around the line of descent from Robert, Earl of Sutherland, b 1350, indicates the uncertainty around whether this line carries SNP BY130907.
