

Academic Software Solutions License Program Instructional Use Software License Agreement

This Academic Software License Agreement (“Agreement”) permits you to install the National Instruments software contained on the accompanying Academic Software Solutions CD (the “NI Software”) on an unlimited number of computers used solely for instructional purposes in your department, college, or on a specific University campus depending on which Software Solutions License option you selected in the applicable purchase order submitted to National Instruments. Please note that only use of the NI Software for instructional purposes is permitted under this Agreement. A use will be considered as one for “instructional purposes” if such use meets either of the following criteria: (i) a common exam is given to students at the end of a semester or other academic period and the exam relates (in whole or part) to the students’ use of the NI Software or (ii) homework or similar projects requiring the use of the NI Software are used for grading in lieu of an exam. In no event, however, may the NI Software be used for research purposes under this Agreement.

This Agreement (together with the underlying license agreement(s) for the applicable NI Software) is your proof that you may install the NI Software on an unlimited* number of computers within your campus, college, or department (as applicable) and provides the terms and conditions under which you may install the NI Software on such computers.

Your purchase order to National Instruments reflects one of the following Software Solutions Licenses:

Campus License

The Software Solutions *Campus* Teaching License (Part number 777455-03). The Campus License permits installation of the NI Software on all computers within a single University campus, but not an entire University system. Examples of single University campuses are the University of Texas at Austin, or the University of Texas at Dallas, Stanford University, and so forth.

College/Faculty License

The Software Solutions *College* Teaching License (Part number 777455-02). The College/Faculty License permits installation of the NI Software on all computers within a single college/faculty. A single college is defined as a collection of related departments. Examples of a single college/faculty are the College/Faculty of Engineering, College/Faculty of Natural Science and so forth.

Department License

The Software Solutions *Department* Teaching License (Part number 777455-01). The Department License permits installation of the NI Software on all computers within a single department. Examples of departments are a Physics Department, Electrical Engineering Department, Mechanical Engineering Department, and so forth.

The name of the applicable Campus, College, or Department is as set forth in your purchase order. The license granted under this Agreement is perpetual; provided all terms and conditions of use are complied with at all times. This Agreement, however, does not entitle you to receive upgrades or enhancements to the NI Software. In order to ensure the NI Software is up to date, we recommend you acquire a separate annual maintenance agreement from National Instruments.

Please provide us with the name and address of the individual who will serve as the central software administrator at your campus/college/department by completing the information in the space provided below (including inserting the approximate number of faculty members who will use the NI Software) and returning a copy of this document to us at the address listed below. You may at any time inform us in writing at the address below should you decide to designate another individual to serve as the central software administrator.

We continually enhance the NI Software by releasing new and improved versions. As noted above, however, this Agreement does not entitle you to receive or otherwise use updates and enhancements to the NI Software. Such updates and enhancements are available to you under a separate maintenance agreement with National Instruments. Should you enter into such a maintenance agreement and pay the applicable maintenance fees, upgrades and enhancements will be provided to your central software administrator during normal distribution cycles, which are typically during the spring and the fall.

The NI Software shall not be used for any commercial purpose. If your organization desires to license the NI Software for a commercial purpose or other purpose not permitted under the scope of this Agreement, you must enter into a separate license agreement with National Instruments and pay all applicable National Instruments license fees before engaging in such use.

NI permits you the right to distribute Virtual Instruments ("VI's") and related documentation that you create with the NI Software; provided such distribution is for academic purposes. Except for the foregoing limited distribution right, in no case may you distribute software deliverables created with the NI Software without the prior written approval of NI.

The terms and conditions of the license agreements which accompany the NI Software (the "Base Terms") are applicable to and govern your use of the NI Software. The terms and conditions of this Agreement, however, which permit the installation of the NI Software on an unlimited* number of computers within the applicable campus, college/faculty, or department (upon receipt by National Instruments of the corresponding license fee) supersede and modify only those terms and conditions in the Base Terms which: (i) prohibit the making of multiple copies of the applicable NI Software and (ii) govern the distribution of VI's. If the Base Terms are not acceptable to your organization, then you may return the NI Software before installing it and request a full refund of the applicable license fees.

* Unless otherwise specified in writing, the NI Software may be installed on an unlimited number of computers with the applicable campus, college/faculty, or department.
